

STATE ELECTRIC
SUPPLY COMPANY
CUSTOMER FOCUSED. QUALITY DRIVEN

We are your **TOTAL ELECTRICAL SOLUTION**

For Oil/Gas Drilling Rigs and Site Maintenance

Since 1952 State Electric Supply Company has been providing companies with the most effective electrical solutions. We are a stocking distributor with multiple locations within the Marcellus Shale. State Electric is available to deliver all of your electrical needs. In addition, as one of the only petroleum lighting distributors in the east, State Electric has partnered with Rig-A-Lite for all of your lighting solutions.

AFL SERIES

FLOOD LIGHTING FOR HAZARDOUS LOCATIONS

Features

- Class I, Division 2, Group A,B,C & D
- UL844 Hazardous Location
- UL1598A Marine Outside Type
- CUL
- Nema 4, 4X
- Wet Locations
- Zone 2, Group IIA, IIB & IIC

Light Source

- HID

The AFL series luminaire is a versatile one-piece aluminum floodlight with a baked on bronze polyester finish, used in environments where protection is needed from liquids or gasses.

The AFL series fixture is available with a heavy duty yoke mount and several mounting accessories that offer the mounting flexibility that our customers need. Commonly used on offshore and on land based drilling rigs, in waste water treatment plants, mining facilities, marine ports & docks, military facilities, pulp and paper, power generation and other areas where hazardous location, wet/damp location or marine grade fixtures are needed.

Available with metal halide and high-pressure sodium lamps and with a wide variety of beam spreads, this product can be designed to meet your needs. It is also available in a wide selection of voltage and wattage options.

SXP SERIES

Features

- Class I, Division 1, Group C & D
- Nema 4, 4X
- UL1598A Marine Outside Type
- UL844 Hazardous Location
- UL924 Emergency Lighting
- Wet Locations
- Zone 1, Group IIA & IIB

Light Source

- HID
- Fluorescent

The SXP series HID and compact fluorescent fixture set the standard for explosion proof lighting in the offshore drilling industry and is also commonly used on land rigs, in refineries, chemical plants, waste water treatment facilities, paint booths and any other area where protection is needed from explosive gasses, dusts and fibers. This versatile fixture is also approved for use in areas where salt water spray and chemicals may be a factor.

This fixture is also available as an explosion proof floodlight. Emergency versions are available as emergency only or emergency and normal operation in compact fluorescent, offering up to 90 minutes of egress lighting. This allows employees to finish their tasks and exit these hazardous environments safely.

SAF SERIES

HAZARDOUS LOCATION HID FIXTURE

Features

- Class I, Division 2, Group A,B,C & D
- Class II, Division 1&2, Group E,F & G
- Class III
- Zone 2, Group IIA, IIB & IIC
- Enclosed and Gasketed
- Wet Locations
- Nema 3R, 4X
- IP 66
- UL1598 Damp Locations
- UL1598A Marine Outside Type
- UL844 Hazardous Location
- UL924 Emergency Lighting
- CSA Certified
- Restricted Breathing
- AExnRII, ExnRII, T3

Light Source

- HID
- Compact Fluorescent
- LED

The SAF series luminaire is our most versatile product by far. Often referred to as the “troffer of the hazardous and severe environment lighting industry”, this fixture is used in environments where protection is needed from liquids or gasses, dusts or fibers.

The SAF series fixture is available with ceiling, pendant, wall, stanchion and cone top mounting options. There are also various combinations of globes, guards, refractors, reflectors and other options to assure that a finished product can be configured to meet your needs. Commonly used on offshore and land based drilling rigs, in waste water treatment facilities, concrete plants, in tunnel lighting, food processing, refineries, chemical plants warehouses, mining and any other area where hazardous location, heavy hose down, wet/damp location, corrosion resistant or restricted breathing fixtures are needed.

One additional feature that makes this luminaire the preferred choice of engineers, contractors and maintenance professionals is that the SAF series fixture is the only HID solution approved for environments where restricted breathing equipment is necessary that does not require annual testing of the restricted breathing listing to maintain it. This safety feature alone separates the SAF from its competition.

Available with metal halide, high-pressure sodium and compact fluorescent lamping options, coupled with the various photometric options assure that the right product can be designed for your application. The SAF is also available in a wide range of wattage options, voltage options and with an emergency battery backup option.

RFNK62 SERIES

Features

- Class I, Division 2, Group A,B,C & D
- CSA Certified
- UL844 Hazardous Location
- UL1598 Wet Locations
- UL924 Emergency Lighting

Light Source

- Fluorescent

The RFNK62 series fixture is our newest product for the land rig drilling industry. It is CSA listed for use in the US and Canada and approved for use in hazardous environments where protection is needed from liquids or gasses.

A marine grade sheet aluminum housing and welded lens frame is highly durable and corrosion resistant, perfectly suited to withstand the harsh environment where it will be installed. Stainless hardware and tool free relamping also add to the ease of installation and maintenance. Dual safety cable attachment points offer flexibility and two half inch hubs make through wire installations easier. Finally, a painted aluminum reflector offers exceptional photometric performance and our ballast housing design offers the ability for service with the fixture still mounted.

The fixture is available with T12 or T8 lamps, included at the purchase price and in a wide range of voltage configurations with emergency battery backup.

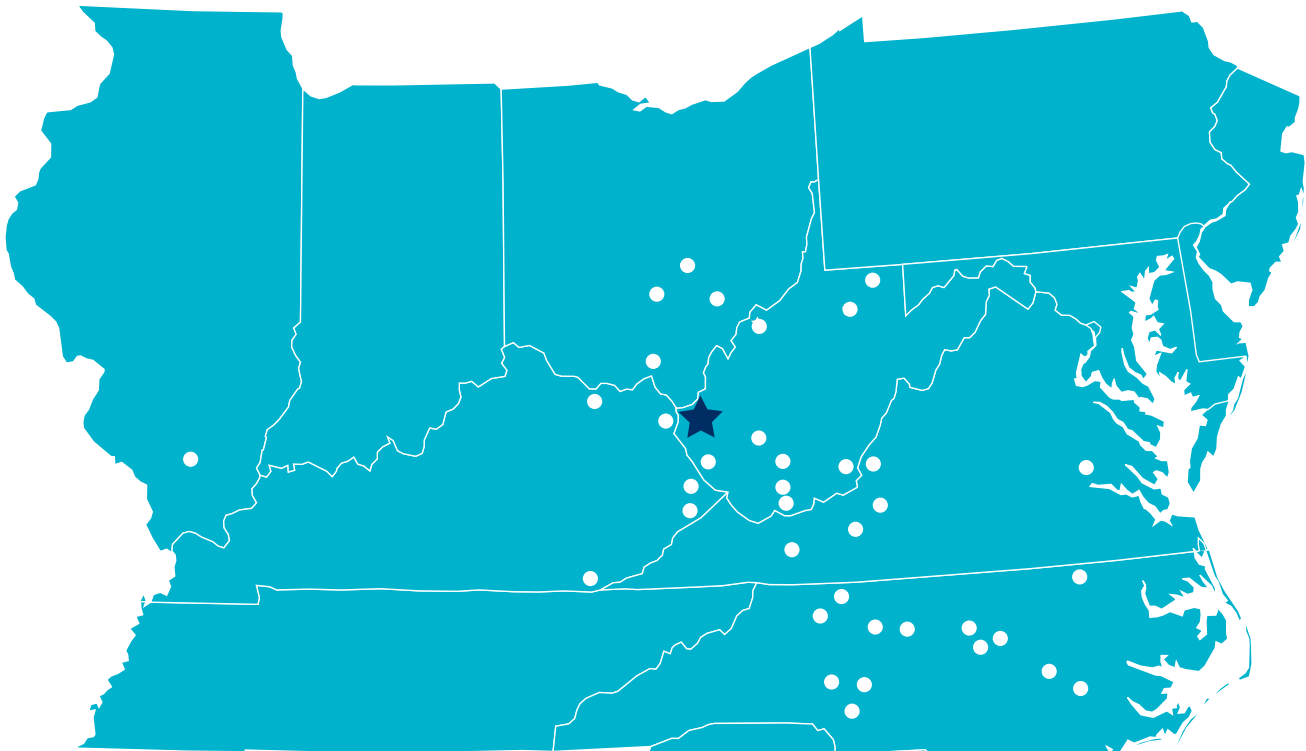

ARKTITE® HEAVY DUTY CIRCUIT BREAKING PLUGS AND RECEPTACLES

Features

- Circuit breaking: plugs through 100 ampere rating may be disconnected under load; 150-400 ampere units are for service disconnect use only.
- Receptacles accept only plugs of the same amperage rating, style and number of poles, making it impossible to mismatch, and provides for positive polarization.
- Extra wide electrical spacing allows for maximum safety.
- Insulator materials are the result of intensive testing. Selection has been made based on highest dielectric strength, maximum mechanical and impact resistance, lowest moisture absorption and highest arc tracking resistance.
- A variety of installations is possible due to the availability of several types of back boxes.
- Designed to withstand rough usage and the effects of adverse environments.
- Reversible interiors, 30, 60 and 100 ampere (except 30 and 60 ampere, 5-pole) Arktite plug and receptacle interiors are interchangeable using a screwdriver. This makes it possible to feed a normally de-energized receptacle from an energized plug with usual Arktite safety; no energized contacts are exposed.

We are One of the Only Electrical Distributors to offer a
Petroleum Lighting Solution in the East

40 Locations in 6 States
